Brother strongly recommends the use of genuine Brother consumable products only. Benefits include better quality prints, greater yields per consumable, protection of your machine from damages and achievement of optimum performance. As a precaution, please note that your machine warranty may not cover any damages arising from the use of non-genuine consumables.

FAST AND COMPACT WITH LED TECHNOLOGY. NOW YOU CAN.

All-new Compact Colour LED Printers

HL-3040CN

HL-3070CW

Brother's Latest Series of Compact Colour LED Printers Give You More

Thanks to Brother's latest series of compact colour LED printers, businesses can now achieve professional-quality documents and impactful marketing materials right in their offices. Designed to print fast, in vivid colours, and more compact to fit into any office space, Brother's new colour series is the latest office solutions ideal for home offices as well as small-and medium-sized businesses or connected workgroups.

Furthermore, Brother's newest family of colour printers use LED (Light Emitting Diode) technology, enabling users a significantly smaller footprint without compromising on quality while saving costs.

So gain control over your printing needs with reduced costs and increased work efficiency – and enjoy new levels of affordability and quality in full colour! Accomplish more with Brother at your side.

HL-3040CN Colour LED Printer with Networking

Thanks to our unique single pass print technology, the HL-3040CN carries out colour printing just as fast as black-and-white, with up to 16ppm (A4) / 17ppm (Letter) for faster and smoother printing, thus improving your productivity. With print resolutions of up to 2,400 x 600 dpi*, this new colour printer delivers consistent and high quality results with sharp images and crisp text. The toners also produce higher gloss level for more vibrancy and smoother graduation.

HL-3070CW Colour LED Printer with Wireless Networking

The HL-3070CW offers all of the features of HL-3040CN, plus wireless 802.11b/g interface so you can place it where it's most convenient and help eliminate cables. You can also save time with Direct Print by printing directly from a USB flash memory drive, or from a digital camera using PictBridge™, without using your computer.

For users with wireless networks, setup has never been easier. If your wireless access point supports SecureEasySetup™, AOSS™ or Wi-Fi Protected Setup™, wireless settings can be automatically configured by simply pressing a button on your router.

The new colour series comes standard with a 3-year on-site warranty coverage which ensures that the product is well-covered so you will enjoy more cost savings and low maintenance.

The Advantages of Brother

Now you can save money, time and resources with Brother. Our Toner Save mode allows you to reduce printing costs due to lower toner usage. Also, our large paper trays and expandable memory coupled by our fast print speed mean that you'll have less waiting time for your print-outs. What's more, Brother's separate toner and drum technology lets you replace toners for a few cycles without changing the drum to reduce wastage and increase substantial cost savings.

In addition, Brother's years of experience allow us to offer efficient and affordable office solutions. These have built-in business tools to help you manage print costs. For instance:

- Colour Restriction tool lets you centrally manage a user's access to colour printing
- Print Allowance^ option restricts the number of pages a user can print, and only the administrator can reset the limit
- Advanced Job Monitoring^ tool checks the log on high volume printing to monitor toner usage

All these and more are made possible because:

1. Brother has more than a century of experience behind the brand. Further, over the past two decades, we have set industry standards with our printing and imaging solutions, and customer service quality.
2. Brother's excellent support is second to none, from pre- to post-sales with up to three years warranty including priority phone support and on-site technical support. Brother products also provide expandable components like paper trays and memory upgradable to allow for future-proofing when your business needs to grow.
3. Brother's green commitment as an environmentally conscious company ensures that our printing solutions have less impact on the environment. Our Energy Star awarded machines are energy savers that automatically reduce power consumption after a designated period of inactivity, hence lower electricity bills and reduced environmental impact. Furthermore, these RoHS (Restriction of Hazardous Substances) compliant printers do not contain harmful and hazardous chemicals defined by RoHS that can pollute the environment.
